## KilnLink

A cloud based Kiln Monitoring System that allows you to check the status of your kiln from anywhere you have access to the internet. KilnLink connects your kiln to the internet and feeds information from each firing in real time to the KilnLink Database. Authorized users, including Skutt technicians, can log-in to view current status, firing history and diagnostics.

If you are ordering a new Touchscreen controlled kiln (KMT), no additional hardware is needed. If you are ordering a new KM kiln with KilnLink you will need 1 LinkBoard per kiln and 1 KilnLink Box to run up to 4 kilns. All KilnLink users will also need to purchase a Data Plan for each kiln.

If you are upgrading an existing KM kiln, we recommend upgrading your controller to a Touchscreen. Alternatively, a LinkBoard w/EasyView is required for upgrading existing KM kilns.
