

Make the smart choice

Find out why Skutt is the
number one selling kiln in America

Outstanding Service

Over 50 Years of Experience

■ Founded in 1953 by father and son team, R.W. Skutt and Neal Skutt, Skutt Kilns remains a family business focusing on innovation and the needs of the customer.

Most Extensive Nationwide Network of Distributors

■ With nearly 200 distributors nationwide you can be assured that there is a distributor near to assist you with your purchase and provide quality service.

Parts and Labor Warranty

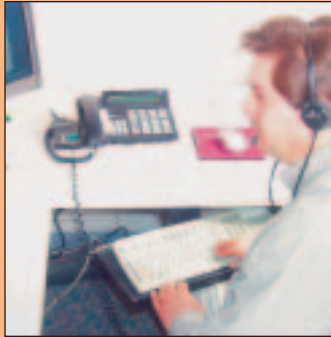

■ There are a lot of different warranties on the market. Some offer longer periods, but pro-rate what they will pay. Others pay for parts but not for labor. At Skutt we have a straightforward 2-year parts and labor warranty. The bottom line is that a warranty is only as good as the company behind it. With Skutt, you know we are going to take care of you.

Technical Service – There when you need it.

■ Our technical department is open 5 days week Monday thru Friday from 7:30am to 5:00pm. We have full-time technicians available to answer your questions. If you have a problem after hours, we have a comprehensive troubleshooting website to help you figure out the problem.

Talk to a Person Not a Recording

■ Our customer service department is connected from the receptionist to the President. It is extremely rare that our phone is not answered by an actual person. If we are busy and you need to talk to someone personally, the phone system will find someone for you, guaranteed!

Most Recommended Kiln on the Market

■ We have worked hard to develop our reputation for consistent quality and outstanding customer service over the years. For this reason we are the number one kiln recommended by distributors, art educators and studio owners.

Under-promise and Over-deliver

■ At Skutt we rigidly test all of our kilns to perform at, and beyond, their maximum capabilities. When Skutt gives a kiln a cone and temperature rating, you can be assured you will receive a lifetime of quality performance. No matter what your application, we have a model designed specifically to meet your needs.

Best Packaging

■ Few things are more disappointing than receiving a kiln that has been damaged in freight. Kilns are fragile items to ship. That is why we have invested in the top-of-the-line packaging system to insure the safe delivery of your kiln. Many of our distributors even offer professional delivery and setup services. They will physically inspect every kiln before they deliver it. Call your local distributor for details.

All Parts Ship Within 24 Hours

■ We understand that the reputation of your business or education program can be on the line when your kiln is down. That is why we guarantee to ship replacement parts within 24 hours. If needed, with express delivery, we can even get your parts to you by the next morning.

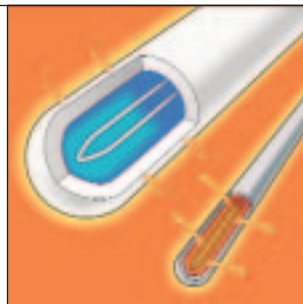

Quality Products

THE THERMOCOUPLE

- A great thermocouple must be **responsive, accurate** and **long lasting**.
- The low mass of Skutt MI cable thermocouples insures that changes in temperature are measured quickly making it one of the **most responsive** thermocouples on the market.
- At Skutt we use only

thermocouples with special limit wire. This is the **most accurate**

wire available for type K thermocouples.

- Every factory installed Skutt thermocouple has an air-tight seal to protect the thermocouple from oxidation and contamination. More protection means **longer life**.

THE BRICK

- Skutt uses only premium hand-selected brick. This is the best brick available. It has fewer

imperfections so it looks great and offers the best insulation.

- Compare a Skutt Kiln

to any other kiln on the market and **you can see the difference**.

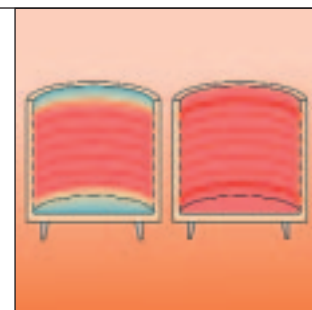

THE ELEMENTS

- There are 2 element grooves in every brick in a Skutt Kiln. This insures that **heat is radiated uniformly** throughout the kiln chamber.
- Skutt balances the heat flow in the kiln by placing hotter elements in the areas that need it. This **improves the efficiency** and

heat uniformity of the kiln and eliminates the need for zone control in most applications. Zone control can unnecessarily extend firing times and requires more maintenance.

- Our elements are computer designed to use the heaviest wire gauge and to minimize watt density.

The result is an element that will run strong firing after firing.

THE STAND

- Our stands are welded, not bolted together, to insure **maximum stability**.

This sturdy, welded construction also means that **no assembly is required**.

We help people make great things.

THE SECTIONAL DESIGN

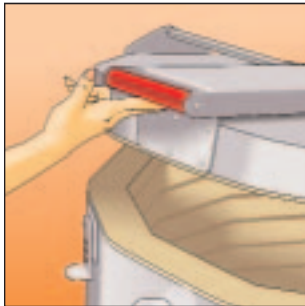

■ Skutt kilns ship fully assembled, however, they can be quickly disassembled in order to move through tight doorways or down stairs. A Skutt kiln can be disassembled and

put back together in less than **10 minutes**.

■ Others have tried to imitate our sectional design but no one is able to match the quality and ease of Skutt.

THE LID

Lid Lifter as a standard feature. These spring-assisted lids are so light you can lift them with a finger. Compare them to other brands and you will **feel the difference**.

■ Every Skutt lid is coated with a strong, long lasting refractory

cement that prevents brick dust from falling into the kiln and improves the lids structural integrity. Since both sides are coated, the lid can be reversed for double the life.

■ A 2-position, lid brace is included for additional safety and convenience.

■ All Skutt 10 and 12-sided kilns come with a

SMART MATERIALS

■ Every component from the handle on the lid to the screws in the control box is made of corrosion-

resistant materials to protect and extend the life of the kiln. The control box is powder coated for

excellent protection from scratches.

THE CONTROLLER

■ We believe our controller has the most user-friendly layout available. Dedicated keys make accessing features straight forward and easy to follow. Even the most sophisticated programs

can be entered by a novice.

■ Features include Pre-Heat, Delay, Alarm, Cone Fire, Ramp & Hold, Program Storage and a host of others. Welcome to the future of firing!

Now you know

We want to make it as easy as possible for you to request and receive the information you need to make a smart purchase. That is why we offer so many ways to reach us.

- Call us: 503-774-6000
- Email us: skutt@skutt.com
- Fax us: 503-774-7833
- Website: www.skutt.com

Order a Free Catalog

Just ask and we will mail you a catalog and price list. The catalog lists every model complete with feature and installation specifications.

Visit Our Website

Just about all of our printed product literature can be easily downloaded off our website. You will also find information on:

- How to Choose a Kiln
